

The Canadian Board of Examiners invites you to get certified in clinical engineering this year.

Why?

A certified individual has a moral and legal obligation to ensure patient safety, ethical practice, and a duty of care to the public. It is your personal choice to represent this officially with a certification in your profession.

Be part of the regulated healthcare professions in Canada (Provincial and Federal)

Get recognition of professional competency in the role of Clinical Engineering (on-going through licensure) for your peers and C-suite (executives and senior administrators of organizations)

Get an edge ahead for career advancement and opportunities both Nationally and Internationally

Set an example for your department to be certified (Be a leader!)

It's time to get your Clinical Engineering Certification!

How do I qualify in Canada ?

Three or more years of Clinical Engineering practice

Licensure in Canada as a Professional Engineer (P.Eng., ing., etc.,) in your respective Province of residence

What steps are in the process of Certification?

Successful completion of written multiple choice examination

Successful completion of an oral examination given by two examiners

When can I apply?

Deadline for new candidates to apply: Typically is July 2021 (Exact Date TBD)

How much does it cost?

Application Fee: \$475 USD (one time fee)

Renewal Fee: \$150 USD (every 3 years)

Apply today through <https://accenet.org/CECertification/Pages/Default.aspx>
